UNIVERSITY,**

D.Y. PATIL MEDICAL COLLEGE, KOLHAPUR

DEPARTMENT OF ANAESTHESIOLOGY

REPORT

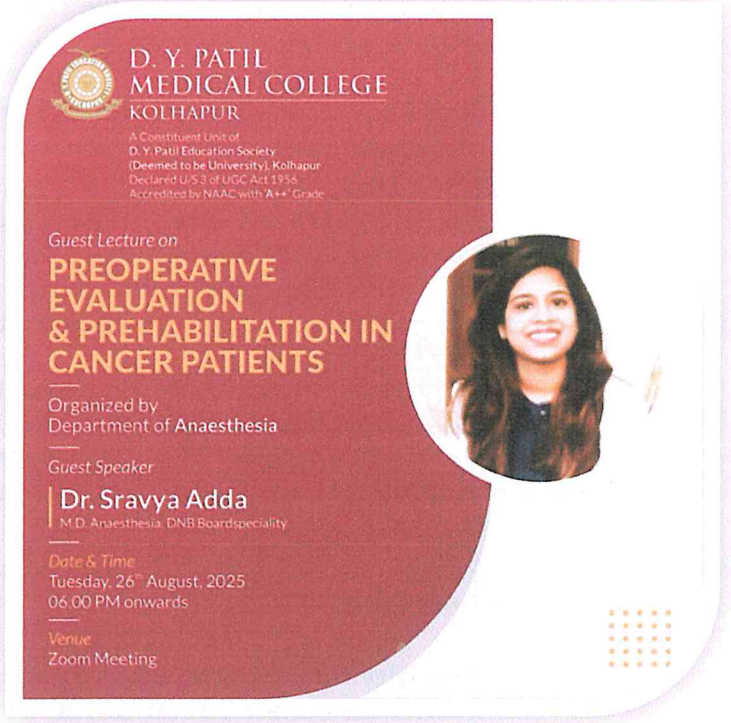

Dr. D. Y. Patil Hospital, Kadamradi

INWARD NO. : 452

DATE : 05.09.2025

TITLE	ALUMNI WEBINAR
TOPIC	PREOPERATIVE EVALUATION & PREHABILITATION IN CANCER PATIENTS
DATE	26/08/2025
ORGANISER	Department Of Anaesthesia
INTRODUCTION	<p>On 26th August 2025 Our department of Anaesthesia conducted a Alumni Lecture today's Alumni lecture on Perioperative evaluation and prehabilitation in cancer patients. Optimizing patients before surgery is crucial to improve outcomes, reduce complications, and enhance recovery in cancer care."</p> <p>provide more information on perioperative care or prehabilitation? Key Highlights</p> <ol style="list-style-type: none">1. Perioperative evaluation: Comprehensive assessment and risk stratification to optimize patient care.2. Prehabilitation: Preoperative interventions to improve physical function, nutritional status, and psychological well-being.3. Goals: Enhance recovery, reduce complications, and improve quality of life.4. Importance in cancer care: Unique needs and challenges in cancer patients require a multidisciplinary approach.5. Benefits: Improved outcomes, enhanced recovery, and personalized care. <p>faculty members where attended this session including HOD sir senior consultants, Dr.Rashmi Bawdekar,Dr.Dinesh E ,Dr.Ajinkya Chougule.all residents and department staff had interactive session with Q and A session after lecture.</p>

<p>OBJECTIVES</p>	<p>Key highlights of the event:</p> <ol style="list-style-type: none"> 1. Improve patient outcomes: Enhance recovery and reduce complications through perioperative evaluation and prehabilitation. 2. Optimize patient care: Provide comprehensive assessment and risk stratification to tailor interventions to individual patient needs.
	<ol style="list-style-type: none"> 3. Enhance quality of life: Implement preoperative interventions to improve physical function, nutritional status, and psychological well-being. 4. Promote multidisciplinary approach: Foster collaboration among healthcare professionals to address unique needs and challenges in cancer patients. 5. Personalize care: Tailor perioperative evaluation and prehabilitation strategies to meet individual patient needs and preferences.

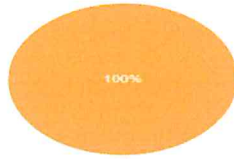

<p>AGENDA & ACTIVITIES</p>	 <p>D. Y. PATIL MEDICAL COLLEGE KOLHAPUR</p> <p>A Constituent Unit of D. Y. Patil Education Society (Deemed to be University), Kolhapur Declared U/S 3 of UGC Act 1956 Accredited by NAAC with A++ Grade</p> <p>Guest Lecture on PREOPERATIVE EVALUATION & PREHABILITATION IN CANCER PATIENTS</p> <p>Organized by Department of Anaesthesia</p> <p>Guest Speaker Dr. Sravya Adda M.D. Anaesthesia, DNB Boardspeciality</p> <p>Date & Time Tuesday, 26th August, 2025 06.00 PM onwards</p> <p>Venue Zoom Meeting</p>

ATTENDANCE SHEET

Which of the following is NOT routinely assessed during preoperative evaluation of cancer patients?

[Copy chart](#)

2 responses

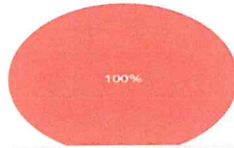

- A. Nutritional status
- B. Functional status
- C. Tumor histopathology
- D. Airway assessment

Prehabilitation refers to:

[Copy chart](#)

2 responses

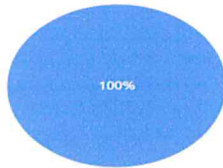

- A. Rehabilitation started after surgery
- B. Exercise and nutritional interventions before surgery to improve outcomes
- C. Postoperative ICU monitoring
- D. Psychological counseling after chemotherapy

Which of the following is a key component of prehabilitation?

[Copy chart](#)

2 responses

- A. Smoking cessation
- B. Immunotherapy
- C. Intraoperative blood salvage
- D. Antibiotic prophylaxis

The most commonly used test for functional assessment in preoperative evaluation is:

[Copy chart](#)

2 responses

- A. Echocardiography
- B. Pulmonary function test
- C. 6-minute walk test
- D. Spirometry with bronchodilator

 Kolhapur.

LEARNING OUTCOME

1. Understand the importance of perioperative evaluation and prehabilitation in cancer patients.
2. Learn about comprehensive assessment and risk stratification strategies.
3. Discover preoperative interventions to improve physical function, nutritional status, and psychological well-being.
4. Appreciate the value of a multidisciplinary approach in cancer care
5. Apply knowledge to improve patient outcomes and enhance recovery.

FEEDBACK & EVALUTATIONS

The primary goal of preoperative evaluation in cancer patients is:

responses

- A. To reduce surgical time
- B. To optimize comorbidities and assess surgical risk
- C. To select chemotherapy regimen
- D. To avoid blood transfusion
